

- the problem the group member set out to solve
- a few sentences about the main things you figured out (be concise)
- which file contains your solution and any instructions on how to run the solution
 - If your solution requires specific modules, please provide a complete list of these early in your instructions.
 - If your solution requires API keys, usernames, passwords, or other special access measures, please provide the necessary information so the instructional team can run your code. We will not create or provide access to accounts to grade your code. If we lack the appropriate access to run your code, you will lose points.
